(Journal of Molecular Structure, Vol. 184)

SUBJECT INDEX

Acetylene
Ab initio investigations on the energetics of starting reactions during the thermal conversion of acetylene, 69

N-Acetyl *N'*-methyl serine amide
Ab initio studies of structural features not easily amenable to experiment. Part 64. Conformation analysis and local geometry maps of the model dipeptide *N*-acetyl *N'*-methyl serine amide, 143

AM1 study
AM1 study of the tautomerism of 2- and 4-pyridones and their thio-analogs, 179

Amides
An ab initio comparative study of the electronic properties of sulfonamides and amides, 115

Basis set superposition error
Interaction energy decomposition and basis set superposition error analysis in hydrogen abstraction from the nitroxyl molecule by atomic hydrogen, 373

Benzene
On the electric properties of the benzene dimer, 399

Benzene dinegative ion
The ground-state geometry and multiplicity of the benzene dinegative ion, 369

Benzenes
Reaction potential map analysis of radical aromatic substitution reactions on substituted benzenes, 355

Benzenoid hydrocarbons
Conjugated circuits in benzenoid hydrocarbons, 159

Benzomorphan
Graph-theoretical study of morphine-, morphinan- and benzomorphan-related opioids, 197

C_3H^+
An ab initio molecular orbital study of the C_3H^+ potential energy surface, 391

Conformational analysis
Ab initio gradient optimized molecular geometry and conformational analysis of 1,2-propanediol at the 4-21G level, 323

Conformational behaviour
Theoretical investigation of the conformational behaviour of the formyl group in oxazole- and thiazole-2-carbaldehyde, 269

Conformational preference
Conformational preference in methylphenyl sulphoxide and in *ortho* substituted fluorine derivatives: a theoretical approach, 261

Conjugated circuits
Conjugated circuits in benzenoid hydrocarbons, 159

Coronoid hydrocarbons
Enumeration and classification of coronoid hydrocarbons. Part V. Primitive coronoids, 165

2h-1p Correlation effects
2h-1p Correlation effects and virtual model spaces for the description of photoelectron spectra of complex molecules, 49

CS-INDO method
Steric effects in the ground and lowest excited singlet states of 3,5-diphenylaminobenzene derivatives: theoretical investigation using the CS-INDO method, 231

Cubic d^x systems
The preferred Jahn–Teller coupling for T states of cubic d^x systems, 289

Cubic f^x systems
State mixing and the preferred Jahn–Teller coupling in cubic f^x systems, 301

Determinantal functions
An efficient calculation of the weights of non-orthogonal determinantal functions from the decomposition of MO wavefunctions, 213
3,5-Diphenylaminobenzene derivatives
Steric effects in the ground and lowest excited singlet states of 3,5-diphenylaminobenzene derivatives: theoretical investigation using the CS-INDO method, 231
Distance between subspaces
Quantum chemical applications of the theory of the distance between subspaces, 1

Electric properties
On the electric properties of the benzene dimer, 399
π-Electron transfer
A scale of variable π-electron transfer, 23
Ethylene carbonate
Single crystal neutron diffraction analysis (15 K) and ab initio molecular orbital calculations for ethylene carbonate, 247

Fluorine derivatives
Conformational preference in methylphenyl sulphoxide and in *ortho* substituted fluorine derivatives: a theoretical approach, 261
1-Fluoropropane
Ab initio molecular orbital studies on 1-fluoropropane, 277
Foliated crystal
Relative stability of the two enantiomeric forms of a foliated crystal: application to kaolinite, 131
Formyl group
Theoretical investigation of the conformational behaviour of the formyl group in oxazole- and thiazole-2-carbaldehyde, 269

Geometry
The ground-state geometry and multiplicity of the benzene dinegative ion, 369
Geometry maps
Ab initio studies of structural features not easily amenable to experiment. Part 64. Conformation analysis and local geometry maps of the model dipeptide *N*-acetyl *N'*-methyl serine amide, 143
Gradient study
An ab initio gradient study of trimethylhydrazine, 311
Graph-theoretical study
Graph-theoretical study of morphine-, morphinan- and benzomorphan-related opioids, 197

Halogen molecules
Pseudopotential and multiple scattering Xα calculations of nuclear quadrupole coupling constants and other properties of diatomic halogen molecules and their monoanions and monocations, 87
HCN
Ab initio vibrational spectrum of HCN monomer, dimer and trimer, 381
Hydrogen
Interaction energy decomposition and basis set superposition error analysis in hydrogen abstraction from the nitroxyl molecule by atomic hydrogen, 373
Hydrogen abstraction
Interaction energy decomposition and basis set superposition error analysis in hydrogen abstraction from the nitroxyl molecule by atomic hydrogen, 373

Interaction energy
Interaction energy decomposition and basis set superposition error analysis in hydrogen abstraction from the nitroxyl molecule by atomic hydrogen, 373

Jahn–Teller coupling
State mixing and the preferred Jahn–Teller coupling in cubic f^x systems, 301
The preferred Jahn–Teller coupling for T states of cubic d^x systems, 289

Kaolinite
Relative stability of the two enantiomeric forms of a foliated crystal: application to kaolinite, 131

Methylamines
Proton affinities of substituted methylamines, 33
Methylphenyl sulphoxide
Conformational preference in methylphenyl sulphoxide and in *ortho* substi-

tuted fluorine derivatives: a theoretical approach, 261
MO wavefunctions
An efficient calculation of the weights of non-orthogonal determinantal functions from the decomposition of MO wavefunctions, 213
Molecular geometry
Ab initio gradient optimized molecular geometry and conformational analysis of 1,2-propanediol at the 4-21G level, 323
Molecular orbital calculations
Single crystal neutron diffraction analysis (15 K) and ab initio molecular orbital calculations for ethylene carbonate, 247
Molecular valence calculations
Molecular valence calculations: second row elements, 79
Molecules
Measuring around molecules, 343
Monte Carlo simulation
Solvation of the tautomeric forms of 2-oxopyrimidine in chloroform solution: a Monte Carlo simulation, 221
Morphinan
Graph-theoretical study of morphine-, morphinan- and benzomorphan-related opioids, 197
Morphine
Graph-theoretical study of morphine-, morphinan- and benzomorphan-related opioids, 197
Multiplicity
The ground-state geometry and multiplicity of the benzene dinegative ion, 369

Nitroxyl molecule
Interaction energy decomposition and basis set superposition error analysis in hydrogen abstraction from the nitroxyl molecule by atomic hydrogen, 373
Non clover leaf structures
Computer assisted prediction of the non clover leaf structures of t-RNA, 11
Non-heme protein
"Mexican-hat" parameters of a non-heme protein, 39
Nuclear quadrupole coupling constants
Pseudopotential and multiple scattering Xα calculations of nuclear quadrupole coupling constants and other properties of diatomic halogen molecules and their monoanions and monocations, 87

Opioids
Graph-theoretical study of morphine-, morphinan- and benzomorphan-related opioids, 197
Oxazole-2-carbaldehyde
Theoretical investigation of the conformational behaviour of the formyl group in oxazole- and thiazole-2-carbaldehyde, 269
2-Oxopyrimidine
Solvation of the tautomeric forms of 2-oxopyrimidine in chloroform solution: a Monte Carlo simulation, 221

Photoelectron spectra
2h-1p Correlation effects and virtual model spaces for the description of photoelectron spectra of complex molecules, 49
Potential map analysis
Reaction potential map analysis of radical aromatic substitution reactions on substituted benzenes, 355
Primitive coronoids
Enumeration and classification of coronoid hydrocarbons. Part V. Primitive coronoids, 165
1,2-Propanediol
Ab initio gradient optimized molecular geometry and conformational analysis of 1,2-propanediol at the 4-21G level, 323
Protein
"Mexican-hat" parameters of a non-heme protein, 39
Proton affinities
Proton affinities of substituted methylamines, 33
Pyridones
AM1 study of the tautomerism of 2- and 4-pyridones and their thio-analogs, 179

Radical aromatic substitution
Reaction potential map analysis of radical aromatic substitution reactions on substituted benzenes, 355
t-RNA
Computer assisted prediction of the non-clover leaf structures of t-RNA, 11

Single crystal neutron diffraction
Single crystal neutron diffraction analysis (15 K) and ab initio molecular orbital calculations for ethylene carbonate, 247
Solvation layer
Counting the number of first layer solvation layer solvent molecules, 103
State mixing
State mixing and the preferred Jahn–Teller coupling in cubic f^x systems, 301
Subspaces
Quantum chemical applications of the theory of the distance between subspaces, 1
Sulfonamides
An ab initio comparative study of the electronic properties of sulfonamides and amides, 115

T states
The preferred Jahn–Teller coupling for T states of cubic d^x systems, 289
Tautomeric forms
Solvation of the tautomeric forms of 2-oxopyrimidine in chloroform solution: a Monte Carlo simulation, 221
Tautomerism
AM1 study of the tautomerism of 2- and 4-pyridones and their thio-analogs, 179
Thermal conversion
Ab initio investigations on the energetics of starting reactions during the thermal conversion of acetylene, 69
Thiazole-2-carbaldehyde
Theoretical investigation of the conformational behaviour of the formyl group in oxazole- and thiazole-2-carbaldehyde, 269
Trimethylhydrazine
An ab initio gradient study of trimethylhydrazine, 311

Vibrational spectrum
An initio vibrational spectrum of HCN monomer, dimer and trimer, 381

Xα calculations
Pseudopotential and multiple scattering Xα calculations of nuclear quadrupole coupling constants and other properties of diatomic halogen molecules and their monoanions and monocations, 87
